

## Spider Treatments

### Internal

- Dust roof void
- (If required) residual spraying of carpet edges and skirting – *Note: all edges to be cleared by customer if this is required.*

### External

- House perimeter including eaves, fascia, gutters, walls, windows, door frames & downpipes etc.
- Sheds & other outbuildings
- Fence lines
- Outdoor furniture

**Note:** You can choose to have an external treatment only if preferred.

### Prior to treatment

- **DO NOT REMOVE WEBS** – as they will pick up residue from a web more readily than any other surface.
- All children's toys to be brought inside or put away.
- All pet bowls, bedding and toys to be put away from areas to be treated.
- Cover fish ponds and turn off pumps during treatment. Pet birds to be brought inside where possible or covered during treatment.
- All pets to be removed and secured away from areas to be treated.
- Cover or move edible plants and herbs.
- Remove all washing from clothes line.
- Close all windows and doors.
- If carpet edges and skirting are to be sprayed please move all items (where physically possible) away from room edges, pick up all children's and pet toys etc.

**Note:** The better you prepare your property, the better the result you can expect to see.

### During Treatment

- All people and pets to remain inside for the duration of an external treatment.
- If having an internal residual spray, all occupants including pets must vacate.

### On Completion of Treatment

- **DO NOT** remove web for up to 3-4 weeks after treatment.
- There will be water marks left on surfaces i.e. walls and windows, these need to remain there for 3-4 weeks also. Windows can be cleaned a few days after treatment however only with a spray bottle and cloth (*to be disposed of afterwards*) – Try not to remove webs from around window edges.
- People and pets are to remain away from internally treated areas for 4hours following treatment and externally treated areas for up to 3 hours following, depending on weather conditions. (*Our technician will advise you of the required time on the day of service*).
- **NOT ALL PESTS DIE OVERNIGHT, IT CAN TAKE UP TO 2 WEEKS FOR THE FULL TREATMENT RESULTS TO BE EVIDENT, FOR THIS REASON WARRANTY VISITS AREN'T BOOKED PRIOR WITHIN THE INITIAL 2WEEKS.**

Approximate Treatment time is 1 hour (*This may vary*)

Pricing – Please contact us with your specific requirements.
