GAS SAFETY

Gas safety is everyone's responsibility.

Got Gas ? Don't touch it.

Only use a licensed gas fitter.

Don't put your safety and your family or friends at risk by doing unlicensed work.

Gas devices have the potential to cause serious injury if not installed or used correctly. The Petroleum and Gas Inspectorate has found that gas safety incidents are generally the result of:

- Not following safe practices or the manufacturer's instructions when using gas devices
- Doing gas work without a Gas Work Licence or Gas Work Authorisation

Always use a licensed gas fitter.

Info from Gas Safety Queensland.

October is

'National Safe Work Month',

and the theme this year is

"Be a Safety Champion"

This year's theme demonstrates that anyone, both employers and workers from any occupation or industry can be a **champion** for work health and safety.

Everyone can support a safety culture at their workplace and promote best practice work health and safety initiatives.

We can all strive to **Be a Safety Champion** at work this October.

Plumbing Trivia

The most recognized video game character in the world is a plumber.

Nintendo's Mario (of Super Mario Brothers fame) was created by Shigeru Miyamoto, and has appeared in more than 200 games
