WATER RESISTANT CANVAS TARPAULINS

Protect or conceal your equipment or supplies while eliminating condensation. Canvas tarpaulins are water-resistant, yet, breathable and strong. All double-stitched seams and hems with brass tie-down grommets spaced approximately 24" apart all around. Please note: tarpaulins may actually finish 3–5% less in size for cut-sized. For finished sizes, please request with order.

CLEAR PVC TARPS & CURTAINS

Made of optically clear PVC these tarps and curtains provide weather and abrasion resistance while providing a totally clear enclosure to allowing viewing and light transmittance. Chemical and abrasion resistant clear PVC also resists grease and mildew. Manufactured with 2" white polypropylene web reinforced hems & brass grommets 24" apart.

Available in 20 MIL, 20 MIL Flame Retardant & 30 MIL.

Custom sizes available upon request.

Part Numbers: T-PVC20-size
 T-PVC20-FR-size
 T-PVC30-size

TEMPER TENT TARPS

A flame resistant vinyl coated Military tent fabric with outstanding tear and UV resistance. Excellent low cost alternative to more expensive vinyl tarps. Manufactured with rope reinforced hems & brass grommets 24" apart.

Colors subject to availability. Black/Olive Drab, Black/Tan, White/Tan & Mint Green/Black.

Part Numbers: TTT-color-size

NEOPRENE COATED NYLON TARPS

UV and chemical resistant tarps that have great abrasion resistance and tear strength. Also resistant to mildew, solvent, grease and some acids. Please call for specifics on acid resistance.

Available in 16 oz. and 40 oz. per square yard. Comes with both sides black.

Standard tarp construction: double stitched seams and hems, brass grommets spaced 24" apart.

Custom sizes available upon request.

KNITTED POLYPROPYLENE SHADE MESH TARPS

Great for nurseries, greenhouses, live stock & crop shade covers, these tarps are sewn with heavy duty 1-1/2" polypro webbing in all hems & grommets spaced 24" apart. Choose from four different shade factors.

Color is Black.
Shade Factors: 40%, 50%, 60% or 70%.

Part Number: MTP-Shade Factor-Size

ROOF LEAK DIVERTERS DRAINAGE TARPS

These drain tarps are designed to protect personnel and equipment from overhead leaks. They are strong yet lightweight. A special design effectively catches and drains water safely away from the work area. Heavy D-rings sewn into each corner to facilitate hanging. Sizes larger than 10' X 10' have D-rings on the center of each side. The drain spout connects to standard 3/4" garden hose (not included) which serves as the downspout.

Light Duty Drain Tarps - Roof Leak Diverters

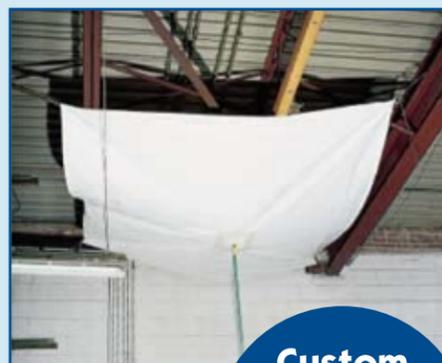

Our most economical drain tarp. Made out of our 12 mil reinforced polyethylene. Sewn with black side showing. **Available in white/white, white/silver and standard black/silver (w/black side showing).**

Heavy Duty Drain Tarps - Roof Leak Diverters

Made out of our standard heavy duty flame retardant 13 oz. translucent vinyl. **Vinyl Colors Available**

Anti-Static Drain Tarps - Roof Leak Diverters

A new, high tech flame retardant, anti-stat resistant white vinyl water leak diverting tarp provides great protection against water damage to computers, electronic equipment, etc. This tarp is made of white 11 oz. anti-static vinyl. It includes plastic dee rings for easy installation and a threaded nipple for standard garden hose (not included) attachment.

Custom sizes available upon request.

5 SIDED MACHINERY AND EQUIPMENT COVERS

These covers are made to fit snugly on machinery and objects with 5 sides. Grommets are placed on the corners and the middle of each side.

Polyethylene covers are made from our TS-12000 material that is black on one side and silver on the other. The material is water, rot, tear, and UV resistant.

Vinyl coated covers are made with our 18 oz. material that is very durable and has high tear strength and good abrasion resistance. **Colors available: black, blue, red, white, gray & green.**

For custom sizes please specify length (left to right), width (front to back) and height (top to bottom). **Many Colors Available.**

INSULATED TARPS & COVERS

Manufactured using either our 12 MIL UV Resistant Poly or 10 oz. Vinyl Coated Polyester these tarps are ideal for concrete curing applications. These covers are available in 1/4", 1/2", 3/4" or 1" thick and are closed cell foam covered. A unique press snap and dee ring arrangement allows for the joining of multiple covers. Common applications include kiln covers and concrete curing blankets.

Any size available. Call for information.

HAY TARPS

Heavy Duty hay tarps are constructed from 12-mil thick UV resistant reinforced poly. Sewn with heavy duty 1-1/2" webbing that runs through the hem and Brass spur grommets spaced two feet apart; plus heavy-duty 2" webbing loops every four feet, which makes securing these tarps easy with rope, pipes, posts, spiral pins and other anchors. Silver outside reflects sunlight, black inside.

Part Number: HT-size

BAGS

All purpose heavy duty gravel or utility bag. Used by roofers and tuckpointers for hoisting lightweight equipment and tools. Made out of 26 oz. heavy #4 natural canvas and has carrying handles made out of 2" wide seat belt webbing. Utility bags are made out of 10 oz. natural canvas.

ROOFERS TEAR-OFF TARPS

Made from super strong 40 oz./sq. yd. black vinyl coated fabric. Sewn with a crisscross and plus pattern, 2" yellow high strength webbing with 3" id X 3/8" heavy steel O-rings sewn to ends of webbing. A great tarp for lifting debris from roofs and construction sites, simply load the tarp with debris, attach a clevis hook to the steel rings and lift.

CAUTION: Not to be used as a lifting sling. Always be sure that no personnel are under any materials being lifted. Watch for any wear points in the tear off tarp. If wear points are visible, do not use the tarp, replace it immediately.

TRUCK TARPS

LUMBER HAULER TARPS

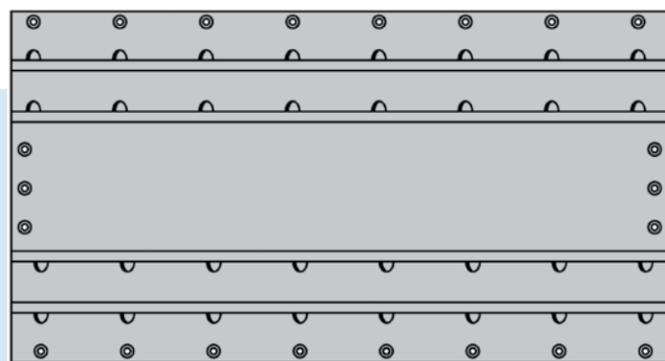

Manufactured with the highest quality fabrics and with the usual high standard craftsmanship from Tarp Supply. All vinyl seams are heat sealed, all hems are double lock stitched. D-rings (if used) are heavy, welded style and tack stitched to insure high tension strength. These tarps are available in any of our fine coated vinyl selection, or with a combination of vinyl weights. Standard tarps are 18 oz. vinyl coated fabric. **"New" Lightweight Tarp. 10 oz. vinyl tarp, strong yet easier to handle.**

We can cover any size rig.

Example: Flat layout of standard lumber hauler tarp with rain flaps and tail curtains 1 end (commonly used in pairs), 3 rows of web and dees, bottom spur grommets.

STEEL HAULER TARPS

Manufactured with the highest quality fabrics and with the usual high standard craftsmanship from Tarp Supply. All seams are double lock stitched. D-rings (if used) are heavy, welded style and tack stitched to insure high tension strength. Select any of the fine vinyl coated fabrics or the 15 oz. water resistant canvas.

Example: Steel hauler tarp with 2 rows of web and dees, bottom grommets.

Accessories Available:

1. Rubber Tarp Straps
2. Cargo Restraint Equipment
3. Patch Kits
4. Reinforced Poly Repair Tape

All Maurtizon Truck Tarps available in any of our vinyl colors.

SPORTS RELATED TARPS

MARTIAL ART, MMA AND BOXING RING COVERS

Rectangle, square, hexagon and octagon available. Made out of vinyl or canvas. Foam pads not included.

Vinyl: 18 oz. vinyl coated polyester mat covers, includes all heat sealed seams, double needle lock stitched 3-ply hems with brass spur grommets spaced 12" apart around perimeter. **Many Colors Available.**

Canvas: #8 (18 oz./sq. yd.) natural cotton duck, sewn with double French (blind) seams and double needle lock-stitched 3-ply hems with brass spur grommets spaced 12" apart around perimeter. **Standard Color-Natural (Off White) Colors Available on Special Request Blue, Red, Black.**

Rectangle, Square, Octagon & Hexagon Available!

- Cutouts with hook and loop closure available to fit around vertical posts
- Vinyl covers available in black, white, red, blue, green, yellow, gray, orange, light blue, brown, tan, purple, forest green, and burgundy
- Combination colors available upon request.

GYMNASIUM FLOOR AND FIELD COVERS

Manufactured in our plant, each Tarp Supply field cover is specifically designed to your requirements. We offer the widest range of materials and colors to suit your needs. Choose our light weight U.V. resistant poly for an economy, easy to handle cover.

Our choose our 10 oz. vinyl coated material for a more durable cover. All field covers are manufactured with heat sealed seams for ultimate weather protection. **Contact us for samples of materials or a quote.**

GYM DIVIDERS

Gym Divider Curtains are made using Flame Retardant Vinyl on the lower portion and Flame Retardant Vinyl Mesh on the top. Gym divider curtains are ideal for separating your work spaces. Available in clear, solid and mesh materials or a combination of all three. All materials meet California Flame Requirements & NFPA 701 Large & Small Scale. **Call for details.**

PAINT BOOTH & WAREHOUSE DIVIDER CURTAINS

These curtains are made with an 13 or 18 oz. flame retardant vinyl and are available in combination with a clear PVC window that is also flame retardant. Chain can be sewn in the bottom hem to provide for light wind resistance. Both materials meet California Fire Marshall (CFM) standards for flame resistance. The clear material is not meant for welding purposes. Our weldview material can be substituted if a welding application is needed.

PUT SPACE TO WORK FOR YOU!

ROLL TRAC®

ROLLTRAC® Moving Curtain Partitions from Tarp Supply Inc. offer a versatile, fast, easy and cost-effective method to manage the work environment by creating specific areas or zones by means of curtains that simply roll back when not in use. There are a wide variety of curtain sizes, materials and hardware components to choose from to form booths and cubicles of any height or configuration. Plus, they can be installed easily by your own maintenance personnel without special tools or skills.

Tarp Supply ROLL TRAC is designed for industrial, commercial and institutional use. It is functional yet attractive, durable and strong, with all components protected against rust and corrosion to ensure long life and smooth, effortless rolling, time after time.

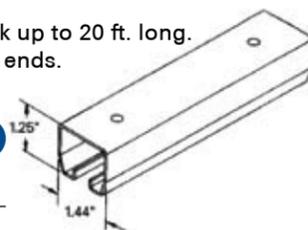

ROLL TRAC® is ideal for:

- Safety precautions
- Power Wash Stations
- Protection against airborne particles
- Protection against environmental hazard
- Helping to eliminate heat or cooling losses
- Restricting visibility for privacy
- Energy and fuel conservation

*Also available in 12 gauge steel and Stainless Steel

CURTAIN TROLLEYS

Available in Nylon or Steel

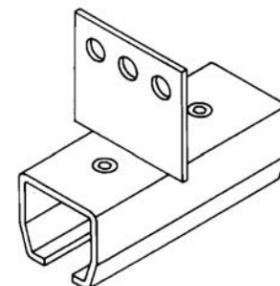

CHOOSE FROM 6 SUSPENSION TECHNIQUES

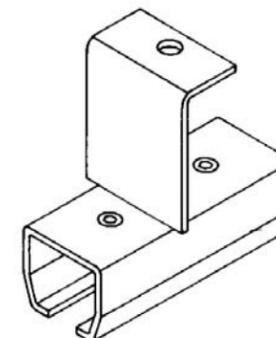

Before ordering your RollTrac System, determine the precise area to be enclosed, the number of sides and dividing panels needed and the height of the curtain or curtains required. You will want to consider the possibility of rounded corners which may be traversed by the curtain, or curtain-stopping right angles. Check the 6 suspension techniques that follow and determine which best suits your requirements. Then order the appropriate hardware parts.

Note: utilize at least 1 support connector for each 5 feet of RollTrac. When measuring the width of curtains, add 10% for draping.

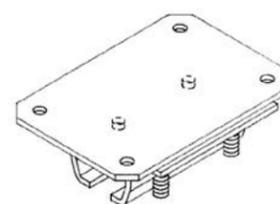

BEAM OR CHAIN SUPPORT MOUNT

Attaches to beam or any member immediately above the top level of the curtain. May be used with round or right angle corners.

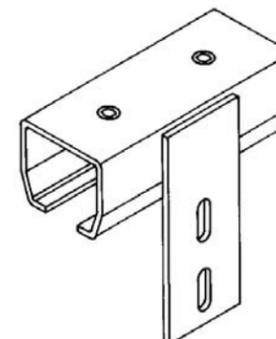

THREADED ROD

For use when there are no easily accessible structures near the track. Threaded Rod attaches to the ceiling height significantly above the track system.

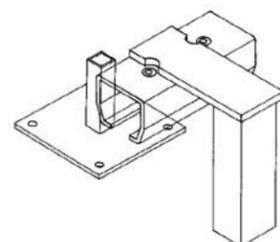

CEILING MOUNT

Attaches directly to ceiling or any flat horizontal surface directly above the curtain. May be used with round or right angle corners.

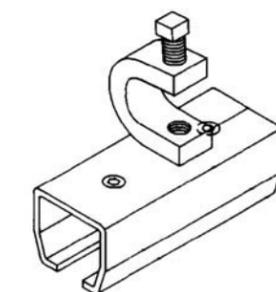

WALL MOUNT

Attaches to walls or any vertical surface. May be used with other mounting techniques.

FLOOR COLUMN (Free Standing)

Permits erection of screens in any area. Base and tube assembly may be used with round or right angle corners.

BEAM FLANGE

Permits attachment of roof truss section, beams and channels. Secured with edge clamps and set screws. Clamps can be rotated for proper alignment.

STRIP DOORS

Conserve energy, eliminate drafts and reduce noise levels, affordably. Flexible PVC strips are durable and easy to install. Clear strips are available in smooth or "ribbed" anti-scratch materials in widths to 16 inches and thickness to .160". Bronze and orange welding strips are available in widths of 8" and 12".

Order complete door systems from the accompanying chart. Units include appropriate number of strips and convenient universal mounting hardware. Please contact our sales office for sizes not listed as well as bronze welding strip curtain systems. Overlap — generally — 8" use 50% overlap; 12" use 2/3 overlap; for noise control full overlap recommended.

Recommended Size of Strips to be Used in Installation of Doors.

Doors to 8'H = Use 8" Strips
 Doors to 14'H = Use 12" Strips
 Doors to 20'H = Use 16" Strips
 Doors over 20'H = Use reinforced 16" Strips

UNIVERSAL MOUNT HARDWARE

Length	Part Number
B-764-FT	H.D. Galvanized Steel

Low Temperature Strip: Suitable for use in freezers and exterior applications. Available in smooth or ribbed. Good to -30° F.

Extra-Low Temperature Strip: Use in freezers operating at room temperatures as low as -60° F.

Black Opaque Strip: Use with conveyor systems and other applications where restricted visibility is required.

*Tarp Supply Vinyl Strip and Sheet are registered as flame resistant by the California Fire Marshall.

Welding Curtains, Screens & Materials

WELDING CURTAINS

Applications include grinding shields, privacy dividers, dust and splash confinement, splash protection, climate control and welding enclosures and more.

12 oz. Olive Drab Curtains

These Flame-Retardant 100% cotton welding curtains are also water & mildew resistant. Recommended for vertical use only, these curtains offer grinding, light sparking, privacy, dust/splash/spray confinement for welding enclosures. Meets CPAI64 Flame Specs. Color: Olive Drab. 20 MIL Thick.

PART NUMBER = WCC-12-size

13 oz. Flame Retardant Vinyl Curtains

These Flame-Retardant vinyl welding curtains are also oil, water and mildew resistant. Polyester scrim provides superior tear resistance and stability for large curtain applications. Recommended for vertical use only, these curtains offer grinding, light sparking, privacy, dust/splash/spray confinement for welding enclosures. Meets NFPA-701 Large and Small Scale & California Fire Marshal approval. Colors: red, black, white, green, yellow, blue, tan & grey.

PART NUMBER = WVL-color-size

14 MIL Weldview Vinyl Curtains

Providing protection for passerby from harmful UV radiation yet still allows viewing of employee by supervisors. These Flame-Retardant vinyl welding curtains are also oil, water & mildew resistant. Recommended for vertical use only, these curtains offer grinding, light sparking, dust/splash/spray confinement for welding enclosures. Colors: yellow, green, blue, orange & grey.

PART NUMBER = WVC-Color-size

20 MIL Clear Flame Retardant Vinyl Curtains

California fire marshal approved, these optically clear curtains are ideal for: grinding shields, dust and spray containment, splash protection and climate control.

PART NUMBER = WVC-CLEAR-size

INSTA-CURTAINS

Insta-Curtains

Insta-curtains are the quick, easy solution for replacement and temporary welding enclosures. This grommeted curtain roll can be cut to your required length using a carton knife or scissors. The grommets are spaced

12" apart on one long edge for strong, safe hanging. Insta-curtains are available in 5 & 25 yard lengths. Two California Fire Marshal approved materials are available: 64" high 14 mil Weld-view & 61" wide 16 mil vinyl.

WELDING CURTAINS

Tarp Supply carries one of the largest varieties of welding fabric materials in the country.

TARP SUPPLY SCREENS feature rugged tubular steel construction and one piece curtains for complete elimination of light transmission between panels. Tarp Supply multi-panel screens feature hinged corners which eliminate connectors which you have to purchase with other systems. All are furnished with platform legs.

Casters available: Part Number = 7709M33 (4 per single panel screen.)

Replacement curtains for all the screens on these pages are readily available. Call us with your requirements

WELDING BLANKETS & CURTAINS

Applications include grinding shields, privacy dividers, dust/splash/spray confinement, and welding enclosures.

Custom sizes available upon request.

Silicone Coated Fiberglass Welding Blankets & Curtains

Excellent protection against molten metal splash when used in vertical position. For constant use at 500 degrees. These curtains and blankets are highly resistant to heat, tearing, punctures, water and oils. They have low smoke emission and are totally incombustible. Available in 17 oz. for light duty and 32 oz. for heavy duty. Colors are grey or red.

PART NUMBER = BSF-Color-Size

17 oz. Salmon Welding Blankets & Curtains

Light duty. Ideal for welding curtains and blankets to contain sparks and light splatter. Other uses include grinding shields, flame retardant equipment covers and weather barriers. Service temperature of about 500 degrees.

PART NUMBER = BSN-17-Size

18 oz. Heat Treated Fiberglass Blankets & Curtains

This light weight cost effective fiberglass blanket & curtain offers protection for lightweight lagging and welding. Ideal for insulation pads, pipe lagging, safety barriers, curtains and shields. These blankets resist most acids, alkalis and solvents and withstands continuous temperatures of 1100 deg. Providing protection from sparks and light splatter. Color: beige. 35 MIL thick.

PART NUMBER = BIS-18-Size

Insul-Shield Fiberglass Blankets & Curtains

This medium weight fiberglass welding blanket & curtain offers superior abrasion resistance than 18 oz. fiberglass. These blankets resist most acids, alkalis and solvents and withstands continuous temperatures of 1100 deg. Ideal for high temp applications that have high sparking and medium splatter. Available in 24oz. for medium duty, 35 oz. and 64 oz. for extra heavy duty. Color: white. 60 MIL thick.

PART NUMBER = BIS-24-Size
PART NUMBER = BIS-35-Size
PART NUMBER = BIS-44-Size

21 oz. Black Slag Shed Blankets & Curtains

This durable coated fiberglass welding blanket reduces airborne fiber emissions while providing protection from molten slag generated during welding. Recommended to be used on a 45 deg angle these blankets are ideal for most welding applications. Color Black. 30 MIL thick.

PART NUMBER = BBF-21-Size

24 oz. Gold Slag Shed Blankets & Curtains

Providing more abrasion resistance than the Black slag shed, Gold Slag shed is a durable coated fiberglass welding blanket that reduces airborne fiber emissions while providing protection from molten slag generated during welding. Recommended to be used on a 45 deg angle these blankets are ideal for most welding applications. Color Gold. 35 MIL thick.

PART NUMBER = BGS-24-Size

18 oz. Aluminized Fiberglass Blankets & Curtains

Used in situations where reflectivity is important, these welding blankets & curtains have excellent thermal characteristics. These blankets have a 4 MIL aluminized foil laminated with a fire-retardant thermoplastic adhesive to our 100% 18 fiberglass. Ideal for heat reflectivity in curtains blankets and shields.

PART NUMBER = BAG-18-Size

Silica Welding Blankets & Curtains

High silica content with superior break and abrasion resistance. EXceptional protection for personnel and equipment against damage from eXtreme heat, molten metal splash, welding sparks and splatter. Available in Medium weight 18 oz. (30 MIL) & Heavy duty 36 oz. (50 MIL). Withstands continuous temperatures up to 1800 deg.

PART NUMBER = BCH-18-Size
BCH-36-Size

Accessories Available:

1. Hooks for 1" & 2" O.D. pipe
2. Curtain ties
3. Chain sewn in bottom hem for extra weight to hold down curtain

Custom sizes available upon request.

HIGH TEMPERATURE TAPES

Tarp Supply offers a broad selection of tapes, ropes and tubing to solve your special insulation problems. Materials provide service temperatures to 1800°F. Select the product that best suits your needs from the following:

FIBERGLASS Fiberglass material with service to 1000°F. Good physical strength. Resists oil, acids and moisture. Also available with pressure sensitive back (PSA).

ALTEX 400 Aramid blend material with service to 650°F. Excellent strength and abrasion resistance. Very flexible with little stretching. Offers good chemical and mildew resistance and is unaffected or only slightly weakened by most acids and alkali solutions.

SILICA Highest thermal characteristics. Service temperature to 1800°F with excursions to 3000°F. NOT recommended in highly abrasive environments. Good flexibility and resistance to moisture, oils and acids.

Note: vermiculite and silicone coatings are available. Contact us for ordering information.

Woven Tapes

Use as a wrap for water and steam piping. To protect hydraulic lines and as lagging and electrical insulation.

Braided Tubing

Protect hose and lines in highly abrasive environments. Cable and wire insulation.

*Sizes shown are smallest diameter accommodated by sleeve. Typically these sleeves expand to accommodate up to 1/4" beyond minimum.

REINFORCED POLY REPAIR TAPE

An extremely strong and durable, 8.6 MIL woven polyethylene fabric coated with a hightack, pressure-sensitive acrylic adhesive system. Formulated to bond to polyethylene even at temperatures as low as -25° F. High temperature resistance to 225° F. Invaluable as an accessory to our TS-12000 fabric. Ideal for onsite repairs, seam sections or for reinforcing critical points.

2 3/4" wide x 20 yards.
Packaged 16 to a case.

Part Number	Color
TSRT-01	White
TSRT-02	Blue
TSRT-04	Black
TSRT-05	Yellow
TSRT-10	Clear

RUBBER TIE-DOWNS WITH ATTACHED "S" HOOKS

EPDM-molded rubber straps for fastening tarpaulins or similar products and for securing various loads. Length based on rubber only.

Specifications for "S" Hooks:
0.172 diameter, C-1019 silicone-kilned hard temper galvanized wire, dry wax coated to protect from rust.

HEAVY DUTY TARP STRAPS

Tensile (ASTM D-412) 1500 PSI	The pounds per square inch required to break a strap
Elongation (ASTM D412) 350%	The percentage of the original length of the strap is taken at the moment of rupture
Durometer (ASTM D-2240) 55 +/- 5%	Hardness of the rubber. Resistance to indentation.
Stretch Recovery 90-100%	The strap is measured and then stretched 150% of its original length (example: 10" stretched to 15" and allowed to remain for 1 hour). After that hour, the strap is re-measured to determine the percent of recovery.
Ozone Resistance (ASTM D-1171) Pass-no cracking	Tarp Straps are stretched 20% and exposed to 50 parts of ozone per 100 million parts of air (50 PPHM) for 70 hours at 104° F. This test evaluates weatherability of the straps when exposed to the elements.
Low Temperature (ASTM D-2137) Pass	Test the brittleness of the rubber at -40° F

MANUFACTURER'S CAUTION:

Wear eye and head protection during tie-downs and disconnects. Sudden unhooking can cause serious injury. Straps should not be stretched more than 50% their original length; check straps for stated safe maximum stretch. Inspect straps before each use. Straps should be discarded if abraded, cut or cracked. Straps should not be substituted as the primary tie-down method for the load.
